

Math and Stat Colloquium

Wednesday, Nov 7

Noon, AnSc 118

Refreshments will be served in the Animal Science Lounge at 11:30 a.m.

Speaker:

Cathy Maahs-Fladung

Utah State University

“Planning a Career in Applied Statistics?”

Abstract: Dr. Cathy Maahs-Fladung will reflect on her career path working for two of the most prominent software vendors in the world as a data mining expert: SPSS (now IBM) and SAS Institute, as well as GlaxoSmithKline and Revolution Analytics. Cathy has over twenty years of experience as a statistician in the area of data mining and software design. Are you planning to be part of a start-up to develop new ways to use R for data analysis? Would you like to enhance existing software packages? If you are planning to enter the private sector after you finish your bachelors, masters or doctorate at Utah State University what kinds of jobs may be in store for you? Join Cathy Maahs-Fladung, assistant professor in the Emma Eccles Jones College of Education and Human Services, as she relates her past experience and answers questions regarding how to go about planning for a career in the private sector.
