

# Math and Stat Colloquium

Tuesday, Oct. 2

12 p.m. ENGR 106

Refreshments will be served in the Animal Science Lounge at 11:30 a.m.

**Speaker:**

**Kady Schneiter**

**Utah State University**

**“Interactive Applets for Teaching Statistics”**

**Abstract:** Interactive applets for teaching statistics provide students with visual representations of important concepts, facilitate simulation, and add interest to presentations. In this talk, I will introduce statistics applets, review some of the major collections of applets for teaching statistics, describe my methods and motivations for creating applets and present some of the work I have done. I will also discuss how I have used applets in my classes and how students have reacted to them.
